

Press Release 10/15/16

CCHS Robotics & Electric Vehicle Racing – October 13, 2016

On Thursday, student representatives of our Robotics and Electric Vehicle teams presented to the North Atlanta Rotary Club during their luncheon meeting at the 57th Fighter Group Restaurant. Our students were professional, poised, and eloquent as they communicated to the room full of adult business leaders. They explained through verbal and visual media the accomplishments of the teams throughout the previous school year, explained their goals for this year, and thanked the group for their continued support over the previous years.

The Rotary members, as were Mrs. Gant & I, quite impressed with the presentation from our students, tomorrow's business leaders. The group was engaged, very attentive, and asked many questions at the conclusion. This seemed to increase the students' already high level of enthusiasm and energy, and they

were gushing with pride. We can all be very proud as the entire faculty & administration has made continual contributions to the development of this group of young adults.

There is no doubt that we will see great things from these students as they head off to college and into their chosen

career paths. Thanks again to the North Atlanta Rotary Club for their shared interest in our mission.
