

Press Release 2/5/17

Clarkston High School VEX Robotics State Qualifier – February 4, 2017

On Saturday, Clarkston High School hosted a VEX State Championship Qualifier, one of only a few left in this season. All our Chamblee teams battled hard, and at the end of the day, 1275D was still standing. They were one member of the 3-team alliance that won the day. They will now be moving on to the State Championship, but with much work to be done before we get there. All our teams have worked hard this season, and have many times made it into the final rounds only to get knocked out. They are all winners and we could not be more proud of their accomplishments.

We have one more major tournament on the schedule for an opportunity to earn additional slots for the State Championships; Friday February 17th at Arabia Mountain High School. Mrs. Gant and I are confident that our teams will accomplish their goal of earning additional slots for the State Championships.

Please offer all of the VEX Robotics students encouragement and support when you see them in the week ahead.

Saturday's winners were:

- Excellence Award, 1320A Tucker High School
- Tournament Champions, 1275D Chamblee HS, 1313C Stone Mountain HS, & 1282C Clarkston HS
- Design Award, 1320C Tucker HS
- Judges Award, 1264B Dunwoody HS
- Robot Skills Award, 1264B Dunwoody HS
